

src/controller/include  
/controller/experiments.hpp

```
graph BT; A["src/controller/src /controller_node.cpp"] --> B["src/controller/include /controller/experiments.hpp"]; C["src/controller/src /experiments.cpp"] --> B;
```

The diagram illustrates a file dependency structure. At the top is a gray box representing a header file: `src/controller/include/controller/experiments.hpp`. Below it are two white boxes representing source files. The left box is `src/controller/src/controller_node.cpp` and the right box is `src/controller/src/experiments.cpp`. Two blue arrows point from the bottom of each source file box up to the header file box, indicating that both source files include the header file.

src/controller/src  
/controller\_node.cpp

src/controller/src  
/experiments.cpp
