

src/controller/include
/controller/world/names.hpp

```
graph BT; A["src/controller/src/world/deleter.cpp"] --> C["src/controller/include/controller/world/names.hpp"]; B["src/controller/src/world/spawner.cpp"] --> C;
```

The diagram illustrates a file dependency structure. At the top is a gray box representing a header file: `src/controller/include/controller/world/names.hpp`. Below it are two white boxes representing source files. The left box is `src/controller/src/world/deleter.cpp` and the right box is `src/controller/src/world/spawner.cpp`. Two blue arrows point from the bottom of each source file box up to the header file box, indicating that both source files include the header file.

src/controller/src
/world/deleter.cpp

src/controller/src
/world/spawner.cpp
